# BRIEF NOTES OF FINANCE

# for the Investor.

The control of the money situation by the Bank of England is still further emphasized by this week's return, made pubyesterday, which shows a slight imvement in its reserve item. The proertion of reserve, reported at 53.69 per ent is the highest with one exception. the corresponding week in 1911, for the has ten years. The changes in the difsere not sufficiently important to reflect mfavorably, notwithstanding the comaratively small increase in bullion holdconsidering that the bank has been sectiving gold from South Africa, Brazil and other countries. The continued reindicates the uncertainty regarding the wind when the Balkan situation will be estirely free of irritating factors, and the consequent strain on the money market.

### The Interest in Coppers.

The better sentiment developed reotly regarding the copper metal market months at least requirements will call for large quantities of copper metal. reported in copper trade circles that there is a continuous heavy American consumption of the metal, factories are nelting is expected during the summer. The domestic deliveries of copper for the ounds, and on this basis, if August and September demands are around similar agures for each month, it is fairly resentable to suppose that a larger volme of new business will develop. Offcial figures show that the stock of refned copper held in the United States on July 1 in primary hands amounted to 1290,850 pounds, and based on the last three weeks' home consumption. On July the total stock of copper and supplies afoat from Chili and Australia were reperted at a decrease of 1,391 tons for the copper affoat for England and France on July 1, 1910. Reports abroad indicate a reduction in the consumption of copper falling off in the total consumption of foreign copper in Europe.

### Somewhat Bewildering.

Prespective buyers of Union Pacific or subscription rights, together with holders of Union Pacific convertibles and stock, have been confused by the circular sent out regarding the rights of stockholders to subscribe for Southern Pacific stock. The bewilderment has been caused by the seeming incongruity of the which allows Union Pacific stockunderstanding of the offer is that nterest in but not for the actual shares arrive before disposing of them. This question can be answered by a statement that all dividends declared from time to time by the Southern Pang certificates, and each additional divi- of \$1,839,389, an increase of \$548,721. The

E. P. Keating, City Auditor of Lorain, Lorain County, Ohio, will receive proposals until noon on August 11 for \$35,-800 5 per cent coupon fire improvement bonds, denomination \$1,000, dated July 15, 1913, and due September 15, 1926.

According to reports, R. M. Grant & o, of New York, were awarded on July 14 \$100,000 5 per cent coupon school bonds of Montclair, West Orange school district, Essex County, N. J.

## TIME MONEY CHEAPER

Out-of-Town Banks Lend Some, but Rate Is Held Up Locally.

Lending of time money for ninety days or four months by out-of-town banks was noticed in the financial district yestrday. The money brokers made the most of the situation, and on signs of an easier tendency to the time money maret made a quick canvass of the large aks in an effort to get concessions. Their efforts for the most part were un uccessful, although repeated attempts ere made to "break the market" by seing \$100,000 for ninety days from the banks held out for 5 per cent. The money put out here for interior offers could not be traced, but it was believed that more than \$1,000,000 or

\$300,000 of such loans were negotiated. The Federal Court at St. Louis yester-lay consented to an order granting per-lasion to the receivers of the Wabash fallroad to sell \$14,000,000 6 per cent remission to the receivers of the Wabash Railroad to sell \$14,000,000 6 per cent re-selvers' certificates with which to take up and cancel a similar amount of 5 per cent certificates maturing August 1.

# THE CROP MARKETS

# Wheat Steady—Corn Unsettled —Oats and Coffee Advance. July August September October November

There was little or no change in the conditions governing the wheat market February conditions governing the wheat market yesterday, export sales offsetting crop news, and prices kept within a narrow range, closing 4c net down to 4c up from Wednesday night's figures. Contradictory dispatches regarding weather and crop conditions caused nervousness and caution among corn traders, and the close showed prices net unchanged to 4c higher. Oats had about a stand-off between reduced corn crop estimates and liberal receipts of old crop, and the net result was a gain of 464c.

Coffee traders have apparently come to the conclusion that the consuming trade here will be compelled to buy before Brazil will have to sell, and yesterday shorts took up a large amount of liquidating sales by longs who were switching into

sales by longs who were switching into distant positions. The close showed that the market had worked up net 12 to 21 points above the previous close, on sales

l EAS. Scotch, \$2.75@\$2.80; green, imported, \$2.75.883.40.

BUTTER—Receipts, 12.211 pkgs. Liberal arrivals, sluggish trade and strong pressure to sell give a lower and much unsettled market, particularly on creamery grades, which compose the larger part of receipts, Outside of strictly fancy it is decidedly a buyers' market. Creamery, extras. 26% 27c; firsts, 25@25%c; seconds, 23%@24%c; thirds, 23c; state dairy, finest, 25% 276c; chirds, 23c; state dairy, finest, 25% 276c; firsts, 24% 25c; common to fair, 22% 25%c; process, extras. 24% 25c; firsts, 24c; factory, June make, firsts, 23%c; current make, firsts, 23

CHEESE—Receipts, 2,449 boxes. Marker quiet with lighter trading, and while quotations are unchanged business at top figures is smaller. Skims duil. State, whole milk, fresh, specials, 144, @ 145c; average fancy, 134, & 14c; under grades, 114, & 134c; state, fresh, specials, 104, & 145c; average fancy, 134, & 14c; under grades, 114, & 134c; state, fresh, specials, 105, & 115c; choice, 8, & 10c; poor to fair, & 75. %; cill skims or badly defective, 8, & 4c.

EGGS — Receipts, 18, 258 cases. Market quiet and unsatisfactory. Even best goods obtainable are not as a rule satisfactory to the better class of trade, and many dealers are being driven to the use of storage egs. Really fine stock is nominally firm, but rarely found. Average good to prime Western sell at 19, 21c, only occasional lots bringing more, and a large part pressed for sale at 16, 216c, with many inferior lots at lower and uncertain prices. Nearby wegs firm in top grades.
